

Your Portfolio.

Seven assets · two cities' worth of handovers · one plan

PREPARED FOR FRANCIS

Marked to market as at 27 July 2026

PORTFOLIO SNAPSHOT

PORTFOLIO VALUE TODAY

≈ **₪28.1M**

2 completed assets at market + 5 off-plan at contract/mark

CAPITAL DEPLOYED

≈ **₪12.2M**

equity in completed + instalments & fees paid to date

PROPERTY LOANS

₪4.54M

Terranova 2.71M · J362 1.83M - both released as planned

ASSETS

7

2 completed · 5 off-plan across Emaar, Meraas-grade projects

RENTAL INCOME PATH

→ **₪780K/yr**

₪200K now (J362) building as four handovers land 2028-29

HANDOVER LADDER

2028 → 2029

Nikki Mar 28 · Address Nov 28 · Golf Dec 28 · Ghaf + Grand Polo 29

Realised alongside: J585 sold ₪2.1M (Apr 25) · FR Villa sold ₪1.54M (Jun 26) - both banked into the plan.

You are running a genuine portfolio: completed equity producing income and loan capacity, a ladder of off-plan handovers, and realised exits funding the instalments. Few private investors structure it this well.

The conflict dip - and why your portfolio barely felt it

The first half of 2026 brought a genuine market wobble: the regional conflict knocked sentiment, softened rents in some completed communities, and paused price growth in the secondary market. The recovery is now visible in the data - district indices have turned positive over the last 3-6 months and transaction volumes are rebuilding.

◆ Your handover ladder insulated you

Most of your positions deliver 2028-29 - the dip happened while they were under construction, where day-to-day pricing matters far less than the level at handover.

◆ Only the completed Lagoons asset really felt it

J362's achievable rent eased to ~D200K in the current market. Values held - Lagoons resales continue to transact - and rents recover with sentiment.

◆ The recovery is the base case from here

District data (JGE +4.96% over 6 months) shows the post-conflict pattern already running. Positions marked flat or below today have their gains ahead of them, not behind.

Honesty note: markets move both ways - this year proved it. Everything in this report marks to evidence where it exists, and says so where it doesn't.

COMPLETED ASSETS

Terranova 34

Value (your basis)	£6,875,797
Equity loan (Aug 25)	£2,705,022
Net equity	≈ £4,170,000

Loan released exactly as planned - this asset is doing its job as the portfolio's capital engine.

DAMAC Lagoons · Costa Brava J362

Value today (for sale)	£3,700,000
Equity loan (Apr 26)	£1,831,000
Net equity	≈ £1,869,000
Rent (current market)	£200,000 / yr

Rent eased from 240K in the conflict market - the one place the dip touched you. Value firm at 3.7M; rents recover with sentiment.

Combined: ≈ £10.6M of completed asset value · ≈ £6.0M net equity · income flowing · £4.5M of released capital already recycled into the off-plan ladder.

THE OFF-PLAN LADDER · FIVE POSITIONS

PROJECT	PRICE	PAID TO DATE	TODAY'S MARK	HANDOVER	PLAN
Grand Polo Club & Resorts	₪9,268,890	₪4,078,312	At original price	Apr 2029	80/20
Nikki Beach	₪3,043,906	₪487,025	~OP · thin resale data	Mar 2028	60/40
Address (unit TBC)	₪1,790,888	₪537,266	At cost · to verify	Nov 2028	80/20
Golf Hillside	₪1,688,890	₪506,667	~OP · see note	Dec 2028	80/20
Ghaf Woods · Capria	₪1,771,000	₪516,590	~-10% · recovering	Jun 2029	60/40

Total off-plan commitments ≈ ₪17.6M · paid in ≈ ₪6.1M (incl. DLD where scheduled)

Reading the marks honestly: Grand Polo resales are transacting at original prices - your position is fully intact. Nikki Beach has too little resale evidence to mark confidently. Golf Hillside resales show EXACTLY original price across the board - a pattern that suggests managed data; in reality it likely sits marginally below. Ghaf Woods is the one honest discount (~10% below OP) - and with handover in mid-2029, it has the longest runway to recover, which the post-conflict pattern supports. Address: confirm the exact project/unit and I'll mark it properly.

The plan's pressure point is visible - and it's in 2029

2025	2026	2027	2028	2029
+£1.38M	+£1.86M	-£0.11M	-£0.10M	-£2.42M

2025-26 ran cash-positive because sales (J585, FR Villa) and loan releases funded the instalments. 2027-28 turn mildly negative as instalments continue - manageable. Then Apr-Jun 2029: Grand Polo's final £1.85M and Ghaf Woods' £708K land within weeks of each other.

THE 2029 WINDOW · ≈ £2.56M DUE · PLAN IT NOW, NOT THEN

- ◆ Grand Polo 50% under-construction loan - your sheet already flags the eligibility check (£4.63M). We should confirm this in 2026, not 2028 - approval windows and criteria change.
- ◆ Handover loans on Nikki (40%), Address (20%), Golf (20%), Ghaf (40%) - sequenced correctly in your plan; each one lifts rental income on completion to offset the borrowing.
- ◆ Rental engine by 2029 - ≈ £780K/yr once all four hand over - covering loan service and rebuilding the cash buffer.

Built like a professional. Timed better than you knew.

The conflict dip landed while your portfolio was under construction - the single best place to be when a market wobbles. Your completed assets kept their value and their function; your off-plan ladder hands over into the recovery. The two jobs from here: confirm the Grand Polo loan eligibility early, and let the ladder do its work.

I track every one of these markets daily and will send this review updated as the picture moves.
